

FAIRBANKS®

ULTEGRA® SERIES GENERAL PURPOSE BENCH SCALES

Fairbanks Ultegra® Series General Purpose Bench Scales are rugged and reliable and can be used in a variety of non-wash-down, general weighing applications up to 150 lbs. There are more than 100,000 Ultegra scales in use today.

RUGGED DESIGN

Ultegra Bench Scales are made of a high-impact gray ABS composite material which makes them lightweight, yet extremely rugged. The composite material is reinforced with molded structural ribs that provide up to 300 percent overload protection. Ultegra scales are also built to handle the abuse often found in industrial environments, while requiring very little maintenance.

ACCURATE

Ultegra scales are built to control deflection, which significantly increases accuracy. Prior to shipping, the Ultegra is factory calibrated to an exact tolerance of 150 lbs x 0.05 lbs.

SIMPLE TO USE

The Ultegra is conveniently powered through a USB cable (AC adapter optional) that connects to any computer's USB A port. Two-key operation (units and zero) allows users to simply select a unit of measure, place an object on the scale and read the display.

UPS SOFTWARE COMPATIBLE

This bench scale can be used for UPS shipping. All you need is a computer and the UPS software (available from UPS).

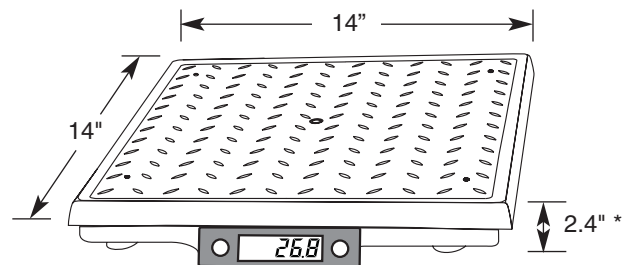

WEIGHING SURFACE

The textured weighing surface reduces surface tension and allows boxes to slide easily across the scale. To maximize operator efficiency, a roller top model is also available, as well as a remote display with 1.5" tall digits and eight-foot cable.

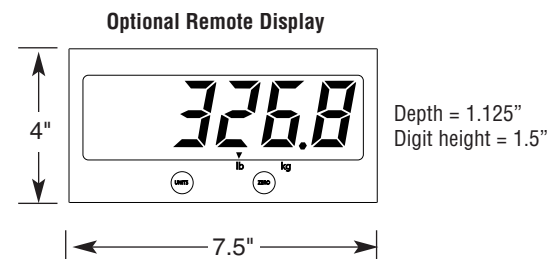

SPECIFICATIONS

Capacity	150 lbs (68 kg)
Platform Size	14" x 14" x 2.4"
	14" x 14" x 3.57" (Roller top model)
Division Size	0.05 lbs (0.02 kg)
Output	USB
Power Requirements	Powered through USB port (optional AC adapter)
Primary Display	0.5" high LCD
Accessories	Remote LCD display with 1.5" characters and an 8' cable; display pillar; counter insert; AC adapter
Approvals	NTEP CC# 98-198; MC# AM-5298

DIMENSIONS

* With roller top, the height of the scale is 3.57"
