

# FAIRBANKS®

## 3550 SERIES TAPE PRINTER

This industrial, dot impact printer is compact, lightweight, and equipped with an abundance of features. It is ideal as a receipt or audit trail printer and can be used for tracking individual weighments, batches, pallet weights, counts or piece weights.

### PRINTING FEATURES

The 3550 Series Tape Printer uses standard three-inch adding machine tape which can be quickly changed through a convenient rear cover. A flashing light will signal when paper is low. High-speed performance is made possible through a bi-directional printing system. An input buffer acts as a data back-up function should power fail during operation. As long as the printer has been powered up for at least ten minutes prior to a power failure, any data in the buffer will be retained for approximately 24 hours. Both small and enlarged character printing can be programmed easily through command codes (programming dependent on instrument capabilities).

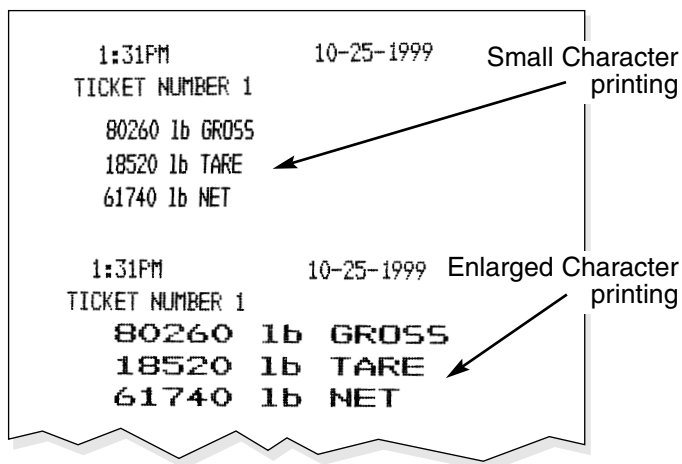

### COMPATIBILITY

Printing options are only limited by the programming capabilities of any instruments used in conjunction with the 3550 Series. This versatile, compact printer, when teamed with any number of digital indicators from Fairbanks' extensive line, will easily record your weighing data.

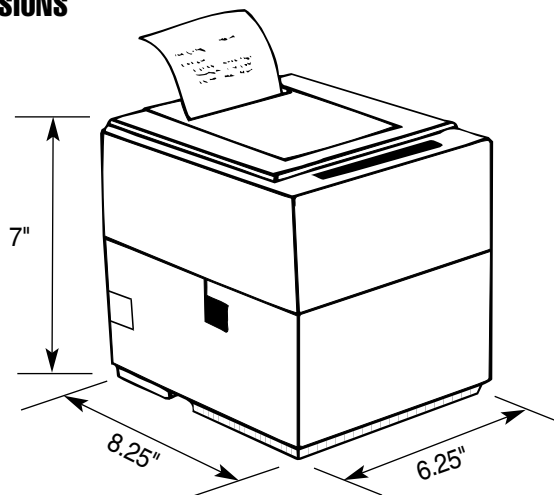

### SPECIFICATIONS

Characters Per Line	Small character – 40 cpl Enlarged character – 20 cpl
Character Height	2.4mm
Ribbon	Width – 13mm; Spool diameter – 30 or 35mm
Paper Size	Standard 3.0" adding machine tape
Serial Interface	RS232C (bi-directional)
Humidity	20% to 80%, non-condensing
Power Requirements	120 VAC ± 10% grounded wire AC
